portfolio

some website links

www.relishkurianphotography.com

They are professional photography team and their requirement was that they need a portfolio website which they need to update from their side regularly and should be viewed in multiple devices. So the website was developed in WordPress CMS and with all the RWD features.

www.amledtechnologies.com

It is a product-based company aimed in selling LED products, they need this website to display their products and promote marketing. They need this site to be developed in latest technology and should be responsive to multiple devices.

www.inaviz.com

It is a 3D visualization company. Their idea about the website is a clean and corporate site which will be responsive in multiple devices.

www.mesolution.org

This is an in-house project done for the ME Creative studio as a portfolio site. This site is also responsive and can be viewed in multiple devices.

www.gridzoneindia.com

This was done for an IT company. They need a website with latest technology like HTML5, CSS3 and Javascript.

www.brdc.in

This project is for the tourism department and it was done for promoting tourism in Bakel Fort.

www.fincuro.com

This was a CMS project developed in Joomla. Their main requirement was they need this site in four different languages and they need a content management system so that they can manage and develop their own content.

www.ten.us.com

This was developed for a company when they completed their 100 clients listing and 10th anniversary.
